

R.ERDEM SIGVA

ELECTRICAL ENGINEER

ABOUT ME

I have a strong desire to come to Germany and work alongside technology leaders. Additionally, I am eager to immerse myself in German culture and strive to become a better individual. I fulfill all the necessary conditions for migration and possess a dedicated and motivated mindset to live in Germany. Thanks to my engineering background, I have the ability to learn rapidly, which aids me in improving my German language skills on a daily basis.

I am an electrical engineer who has knowledge of LED lighting and uses AutoCad, Dialux and Illustrator programs well. I work on both my english and german every day. As part of my job, I like to follow up-to-date technologies. By working on such issues, I aim to improve both myself and the company I work for.

WORKING EXPERIENCE

01/23 - Present HOKASU LIGHTING

Electrical Engineer, Istanbul

I worked for Hokasu Lighting, a company that manufactures indoor lighting products. My responsibilities included conducting product placements and performing lighting calculations based on customer requirements. I enhanced my proficiency in project drawings, enabling me to utilize programs more efficiently. Additionally, I developed my skills in AutoCAD and Dialux.
Sefa Atasayan - +90 532 263 76 10

11/20 - 12/22 EMFA ELEKTRIK

Electrical Engineer, Istanbul

I had my initial work experience at Emfa Elektrik, a company specializing in the production of outdoor lighting products. During this time, I gained valuable knowledge about different types of lighting products and their respective features. I learned how to determine the appropriate lighting solutions for various areas and became familiar with the components used in lighting products, such as LEDs, power supplies, and drivers. Through the use of Dialux, I acquired proficiency in project drawing and lighting calculations.

Adnan Kasapoğlu - +90 532 376 50 28

06/18 - 08/18 EAE ELEKTRIK

Intern, Istanbul

During my internship, I acquired proficiency in using AutoCAD. I had the opportunity to observe the installation of BUSBAR-type energy channels in the project and gained an understanding of the appropriate products to be utilized in such installations.

EDUCATION

2013 - 2019

Electrical Engineering **Yıldız Technic University , Istanbul**

During my university years, I participated in various clubs that were both related to my studies and for social purposes. Additionally, some friends and I started a new club. We noticed that our school didn't have a bicycle club, so we decided to do something about it. After following the necessary regulations, we established the Bicycle Club with a group of six friends. Within two years, our club grew to 100 members, and it continues to grow. As my university life came to an end and my professional life began, we handed over the club to the new students.

In addition to these activities, I realized my interest in the lighting industry during university. This led me to work on various projects with my lighting education instructor, where I learned how to use Dialux and AutoCAD. For my graduation thesis, I developed a Wi-Fi controlled lighting system integrated with Arduino for a smart home.

COURSES

2023 - Derzeit

GERMAN COURSE *Istanbul*

2017 - 2018

PHOTOSHOP *Istanbul*

2016 - 2017

AUTOCAD *Istanbul*

2015 - 2016

WEBDESIGNER COURSE *Istanbul*

SCHOOL CLUBS

2015 - 2019

YTU BICYCLE CLUB One of founders of the club.

2014 - 2019

MANAGEMENT CLUB Member of the club.

2014 - 2019

QUALITY AND EFFICIENCY CLUB Member of the club.

HOBBIES

Music

I am playing drums almost for 2 years. I think, playing

- any musical instrument take a very important place in human development.

Reading

"Who knows to most? Who reads a lot or who travels a lot" I answer to this question everytime

- "who reads while travelling". Books must have in one's life. We can learn from the things we cannot experience through the experiences of others.

Self-Development

People must keep adding something to themselves. I think, a person can not know everything. But that

- does not mean learning new things is a waste of time. People should always improve themselves. There is always better you inside.

Camping/Travelling

Two years ago, I have traveled to Turkey's west coast bicycle for 2

- months. I made my stay mostly in nature and camping. I think people can turn into themselves and discover new features in nature.
